COLOMBIA

Colombian coffee refers to coffee beans grown in the South American country of Colombia. Colombian coffee is characterized by its balanced flavor profile, with an elegant balance of sweetness and moderate acidity. This delicate balance sets Colombian coffee apart from other varieties and elevates it as the preferred choice. Simultaneously, Colombian coffees cultivated in diverse regions showcase a spectrum of flavor notes and an extensive array of aromatic alternatives.

GUATEMALA

Decaf Mexico Azul is a decaffeinated coffee made from Arabica beans grown in various regions of Mexico. Special processing methods extract the caffeine so that the aromas and taste are preserved while the caffeine is removed. For those who want to savor coffee without impacting their energy levels, this decaffeinated option is an excellent choice.

SUPER CHARGER

Super charger coffee is a special type of coffee made from high-quality Arabica and Robusta beans grown at high altitudes, specially produced for professional athletes and people who do sports. Special processing methods are often used to enhance the aromas and taste of the beans. This type of coffee is preferred by athletes to increase their energy levels and support their physical performance. With its different caffeine ratios, it increases energy and endurance for athletes during workouts and offers a unique coffee experience for those who want to start the day energized and keep their energy at its peak during intense work tempo.

HOUSE BLEND

House Blend coffee is a type of coffee in which coffee beans from different regions are carefully selected, mixed, and blended. This blend aims to balance the characteristics of coffee beans from different regions and create a homogeneous flavor profile. House Blend coffees usually consist of medium roasted beans and offer a wide range of flavors. These types of coffee can be preferred by people who want to experience the characteristics of different regions together or who are looking for a classic coffee taste.

TÜRK KAHVESİ

Turkish coffee is a traditional Turkish beverage prepared by boiling ground coffee beans with water and sugar. The finely ground coffee beans are brewed by boiling them in a coffee pot and then served in a cup. Turkish coffee has an intense and rich aroma. It is traditionally served with different flavoring options such as "black" (no sugar), "low sugar" and "sweetened". It usually ranges from medium to high hardness and roasted to medium dark.
